

KartridgPak® CH-70

Chub packaging machine

The KartridgPak CH-70 is the latest mid-speed chub packaging machine designed for companies with lower volume production needs. Built on proven, reliable technology, it ensures lasting value and quick return on investment.

With speeds of up to 70 chubs per minute, the CH-70 offers unmatched flexibility, supporting various product sizes and lengths while minimizing downtime with fast changeovers. Its servo-driven system ensures durability and easy maintenance, while vertical hot air sealing delivers precision and consistency in every package. This machine gives you complete control over your production by allowing you to select your wire and film supplier, lowering your total cost of ownership and optimizing your packaging process.

Key benefits

- Voiding system removes product from the clipping area, making tight clean package ends and lowers product waste
- Film material available provides excellent barrier properties against oxygen, light and moisture, maximizing shelf life
- MAP Systems® offers 21-45 additional days of shelf life

Technical specifications

Film speed	Up to 800in (20.320mm) per minute
Footprint	80.3in (2040mm) x 56.3in. (1430mm) x 91in (2312mm)

Features and benefits

- Film drive with registration
 - Film and clip synchronized for exact clip placement & reliability
- In-line continuous motion clipping
 - Uniformed film gathering
 - Reduces downtime & parts usage
 - Quick changeovers
- Enhanced voiding system
 - Improved portion control
 - Removes viscous product from clipping area
 - Reduced product contamination
 - Creates tight clean package ends
- Materials cost savings
 - Flat web vs casing offers 20-30% savings
- Sanitary design
 - Stainless steel construction and round surfaces for drainage contribute to improved sanitary features
- Machine access
 - Double hinged clear guard doors provide superior visibility and access

Applications

Food

Butter
Cookie dough
Cream Cheese
Ground meat
Ice cream
Liverwurst
Marmalade/jams
Marzipan
